GLOBAL BUT LOCAL PARTNERSHIP

ROOFING

Sika provides a full range of single-ply and built-up flat roofing systems incorporating both flexible sheet and liquid applied membranes. Demand in this segment is driven by the need for eco-friendly, energy-saving solutions such as green roof systems, light-reflective cool roofs and solar roofs, which simultaneously help to cut CO₂ emissions. While refurbishment projects continue to gain significance in the mature markets, the emerging markets are moving towards higher-quality roof solutions.
